

Cartridges filtration

Référence : FIC/3000

Implementation of a cartridge filtration process

GENERAL SPECIFICATIONS

- 90 L feeding tank, stirring, cartridges filter.
- Centrifugal pump.
- 60 cm cartridges filter.
- 3 body filter, with different type of filters.

Instrumentation

- 4 flowmeters.
- 4 manometers.
- Turbidimeter.

Dim : 190 x 80 x 200 cm – 120 kg
SS tubular framework 40 x 40mm

Categories: Educational Engineering Environment Filtration Water treatment

Reference: FIC/3000

DESCRIPTION

Manipulation In series and in parallel of different types of filters

Effect on the quality of the filtrate

Quality evaluation of different filters from the filtrate

The fluid flow rate from the differential pressure across the filter

Qualitative and quantitative comparison with the experimental data

Utility filtration upstream processing chain

Unités livrées avec un manuel pédagogique
et dossier technique

Possibilité d'adapter les unités à vos
besoins

Mise en service, formation des
formateurs
