

Electrodeionization

Référence : TED/3000

Production of highly purified water

GENERAL SPECIFICATIONS

- 400 L tank.
- 500 L tank.
- Centrifugal pump.
- Filter 0,2 μ 5 cartridges.
- Electrodeionization system.
- Hardness of the water, measurement kit.
- CO₂, measurement kit.

Instrumentation

- Temperature probes.
- 3 flowmeter.

- 4 manometers.
- Electrode of conductivity.
- 2 level sensors.

Dim : 270 x 125 x 190 cm – 210 kg
SS tubular framework 40 x 40mm

Categories: Educational Engineering Environment Water treatment

Reference: TED/3000

DESCRIPTION

Study of a process for electric regeneration demineralization

Water polishing step in a reverse osmosis

Unités livrées avec un manuel pédagogique
et dossier technique

Possibilité d'adapter les unités à vos
besoins

Mise en service, formation des
formateurs
